Guidelines:

- ♥ If you stay in the same time slot, your overall program will be very balanced. When you begin to switch time slots, you will need to ensure you've got enough variety and balance in your program without overdoing it in any one area. Scheduled trainers may change based on availability.
- ♥ If you have any questions, contact us at **360-574-7292**.

Adrenaline Cycle / Interval Cycle	Experience the ride of your life. This low-impact cycling workout is designed to improve your cardiovascular fitness and maximize caloric burn by incorporating interval based drills, visualization and effective coaching techniques. A great workout for those who would like to lose body fat or maintain a lean physique. Expect to burn an incredible 600-800 calories in 60 minutes. Interval Cycle will focus more on speed and high intensity intervals and Adrenaline Cycle will focus on endurance.	CV
Cardio Muscle Definitions	This class will give you everything you need in a Full Body Muscle and Cardio workout! You will burn anywhere from 500-900 calories and tone and sculpt your entire body! Our award-winning trainers will take you through this one hour workout guaranteed to get your heart pumping and muscles firing! Each workout is different so you'll never get bored and your body will never plateau!	CV M
Zumba	Zumba is a fun, energizing, dance-fitness fusion! International, pulsating rhythms ignite dynamic, easy-to-follow movements inspired by salsa, meringue, hip hop, belly dancing, and more! Zumba's format creates an invigorating workout that burns fat and tones your body from head to toe.	CV
Muscle Tone & Sculpt	Tone and Sculpt your muscles while training the entire body utilizing dumbbells, kettlebells, tubing, medicine balls, stability balls, Gliding Discs, BOSU Trainers and other training tools. This session will sculpt, tone and develop muscle definition in your entire body.	M
Pure Strength	Take your strength to the next level with this full body muscle conditioning workout. Pure Strength will provide incredible benefits including an enhanced metabolism, higher caloric burn, improved bone density, better posture, reduced risk for injury, better muscle tone and strength and so much more. Strength training is the true fountain of youth!	M
Fitness Barre	Experience the benefits of this demanding workout that blends balance, endurance, stretch and strength at the Barre and on the Mat. Using light weights and lots of reps, you will build and improve power, grace and athleticism. This class is great for athletes that need cross training & anyone that wants to feel stronger and more stable in their bodies.	M
Barre Yoga	This format combines two amazingly beneficial classes into one, Barre Fitness and Yoga Sculpt, a perfect blend of strength, balance, mobility and stretching to help round out your fitness program!	M F
Core & Mobility	A muscle conditioning session designed to train the stabilizer muscles located around the abdominal region and the spine. This session maximizes optimal posture and stability, lowers the risk of injury and will help develop a strong, tight and toned mid-section. This will also include some mobility work to keep you moving better and feeling your best!	M
Yoga Sculpt	Strengthen your entire body and erase your body's tension with this Yoga Sculpt program. You will improve your flexibility, balance, enhance relaxation and release stress while improving total muscle conditioning. Yoga Sculpt will focus on more challenging poses and intense holds.	M F

Cardiovascular Conditioning (CV) - These types of sessions will improve the health of your heart, burn a ton of calories and develop overall fitness conditioning. They are a must for those of you wanting to burn body fat.

Muscle Conditioning (M) - These types of sessions are absolutely critical for so many reasons. First, the best physiologists in the world are reporting that muscle conditioning is the most important component for reversing the aging process. By regularly participating in these sessions you will maintain muscle mass, develop your strength, improve your muscle tone and definition, increase your metabolic rate, achieve a healthy body weight and fat percentage, improve your posture, strengthen your bone density, improve your balance, and more! Muscle conditioning programs are the fastest way to change your body shape. You should incorporate three muscle conditioning workouts into your schedule each week.

Mind/Body Fitness and Flexibility (F) - If you want to avoid injuries, reduce tight and stiff areas, manage your stress and develop muscles that are both strong and pliable, these sessions are perfect for you.

- For maximum fitness potential, you should avoid doing too much of any one program and instead choose from a variety of programs. Ensure you have enough variety and balance in your program without overdoing any one area.
- In order to take full advantage of a proper warm-up and cool down, secure your space and equipment, and so as to not disturb your fellow workout buddies, we ask that you arrive on time and stay until the end of all classes. If you are running late or absolutely need to leave early, we ask that you enter or exit quickly and quietly. Please understand that entering or leaving a class during a meditative segment can be disruptive to the other exercisers.
- To allow your trainer to guide you appropriately through each workout, please advise them if you are a beginner, pregnant, have high blood pressure or any other medical condition, injury, or pain that may affect your ability to perform certain movements.
- Trainers may change based on availability
